THE LOSSES INCLUDED IN THESE STATISTICS ARE DETAILED ON PAGES 5 TO 8.

(a) Some cases of condemnation may have been consequent upon stress of weather, &c., experienced prior to the period covered by the return. Vessels condemned after damage by fire, collision, stranding, &c., are included, according to the dates of the casualties, under "Burnt," "Collision," "Wrecked," &c.

(b) Under the heading "Missing" are included only vessels posted or reported during the quarter as missing.

(c) Under the heading "Wrecked" are included vessels lost through stranding, or through striking rocks, sunken wrecks, &c.

are included, according to the data available.
 (b) Under the heading "Lost, &c." are included total losses which, for want of sufficient information,
 or for other reasons, cannot be otherwise classified.

TABLE No. 2:—Showing the number, net tonnage and nationality of SAILING VESSELS totally lost, condemned, &c., during the quarter ended 31st March, 1895, as reported up to the 13th July, 1895, and showing also the number and tonnage of sailing vessels owned in each country. (Vessels under 100 tons net are not included in this return).

THE LOSSES INCLUDED IN THESE STATISTICS ARE DETAILED ON PAGES 5 TO 7.

(a) Some cases of condemnation may have been consequent upon stress of weather, &c., experienced prior to the period covered by the return. Vessels condemned after damage by fire, collision, stranding, &c., are included, according to the dates of the casualties, under "Burnt," "Collision," "Wrecked," &c.
(b) Under the heading "Lost, &c." are included total losses which, for want of sufficient information, or for other reasons, cannot be otherwise classified.

(c) Under the heading "Missing" are included only vessels posted or reported during the quarter as missing.
(d) Under the heading "Wrecked" are included vessels lost through stranding, or through striking rocks, sunken wrecks, &c.

are included, according to the dates of the construction, or
 (b) Under the heading "Lost, &c." are included total losses which, for want of sufficient information,
 or for other reasons, cannot be otherwise classified.

TABLE No. 2:—Showing the number, net tonnage and nationality of SAILING VESSELS totally lost, condemned, &c., during the quarter ended 30th September, 1895, as reported up to the 14th November, 1895, and showing also the number and tonnage of sailing vessels owned in each country. (Vessels under 100 tons net are not included in this return).

THE LOSSES INCLUDED IN THESE STATISTICS ARE DETAILED ON PAGES 5 TO 7.

(a) Some cases of condemnation may have been consequent upon stress of weather, &c., experienced prior to the period covered by the return. Vessels condemned after damage by fire, collision, stranding, &c., are included, according to the dates of the casualties, under "Burnt," "Collision," "Wrecked," &c.

(c) Under the heading "Missing" are included only vessels posted or reported during the quarter as missing.

(d) Under the heading "Wrecked" are included vessels lost through stranding, or through striking rocks, sunken wrecks, &c.

or for other reasons, cannot be otherwise classified.

TABLE No. 2:—Showing the number, net tonnage and nationality of SAILING VESSELS totally lost, condemned, &c., during the quarter ended 31st December, 1895, as reported up to the 9th March, 1896, and showing also the number and tonnage of sailing vessels owned in each country. (Vessels under 100 tons net are not included in this return).

WRECK STATISTICS FOR 1895.

The statistical summary of vessels totally lost, condemned, &c., now published by Lloyd's Register, shows that, during 1895, the gross reduction in the effective mercantile marine of the world amounted to 1,237 vessels of 806,278 tons, excluding all vessels of less than 100 tons. Of this total, 310 vessels of 372,463 tons were steamers, and 927 of 433,815 tons were sailing vessels. These figures exceed the average of the preceding four years by 62 steamers of 81,519 tons and by 55 sailing vessels of 42,940 tons. As regards steamers owned in the United Kingdom the return is also above the average, while as regards sailing vessels it is somewhat below. The increase in the case of the former is due not to actual wrecks but to the large tonnage broken up, condemned, &c. Apart from such cases, the United Kingdom steam tonnage lost during 1895 is only equal to the average of the last four years, notwithstanding that since 1891 the tonnage owned has increased by $1\frac{1}{2}$ million tons.

The summary exhibits interesting data as to the relative frequency of the different kinds of casualty, &c., which conclude the existence of vessels. Strandings and kindred casualties which are comprised under the term "wrecked," are much the most prolific cause of disaster. To such casualties are attributable about 40 per cent. of the losses of both steamers and sailing vessels. The next most frequent termination of a vessel's career is by condemnation, dismantling, &c.; 20 per cent. of the vessels removed from the merchant fleets of the world, are accounted for in this manner. Of the remaining causes of loss, collision is the most general for steamers (16 per cent.) and abandonment at sea for sailing vessels (15 per cent.). Cases of abandoned, foundered, and missing vessels may perhaps be regarded as frequently more or less similar in the circumstances of loss. If these be taken collectively, they comprehend 18 per cent. of the losses of steamers and nearly 30 per cent. of the losses of sailing vessels. The percentages here given are based on the present return alone, but the order of frequency of the several classes of casualty appears to be normal.

The return has been compiled by Lloyd's Register in such a manner as to enable a comparison to be made between the percentages of loss suffered by each of the principal merchant navies of the world. Great as the absolute annual loss of vessels belonging to the United Kingdom appears to be, it is seen to form a very moderate percentage of the mercantile marine of the country, and to compare favourably with the losses sustained by other leading maritime countries. The merchant navies which exceed a total of 1,000,000 tons are those of the United Kingdom, the British Colonies, the United States of America, France, Germany, and Norway. Of these countries, the United Kingdom shows the smallest percentage of loss, viz.: 3.0 per cent. of the vessels, and 2.4 per cent. of the tonnage, owned; the British Colonies follow with 3.4 per cent. of vessels and 3.7 per cent. of tonnage; and Norway is the highest with 7.4 per cent. of vessels and 6.5 per cent. of tonnage. As regards steamers, the percentage of loss for the six countries is 2.5, while the percentage for the United Kingdom stands at 2.33. For sailing vessels, the six countries give a percentage of 6.3 as compared with 4.5 per cent. for the United Kingdom.

Lloyd's Register of British and Foreign Shipping.

STATISTICAL SUMMARY

OF

VESSELS OF ALL NATIONS,

OF 100 TONS AND UPWARDS,

TOTALLY LOST, CONDEMNED, &c.,

DURING THE YEAR

1895.

NOTE:—This Summary is based upon the quarterly returns of total losses, &c., which have been published by Lloyd's Register. It includes, however, vessels which had not been given up as total losses, or of the loss of which information had not been received, when the returns for the quarters in which they respectively occurred were compiled. On the other hand, a few vessels which, being definitely considered as total losses at the respective dates of compilation, were included in the quarterly returns, have since been floated, repaired, &c., and are accordingly now excluded from the statistics given herein. Particulars of all such additions to, and deductions from, the quarterly returns are given on pages 5 to 8.

A distinguishing feature of the Wreck Returns published by Lloyd's Register is that, except as stated in the footnotes to Table No. 1, they are compiled strictly according to the dates at which the casualties resulting in total loss actually *occurred*, and not according to the dates at which *reports* of casualties were *received*.

2, WHITE LION COURT, CORNHILL LONDON.

July, 1896.

TABLE No. 1:—Showing the number, net and gross tonnage and nationality of STEAM VESSELS totally lost, condemned, &c., during the year 1895, as reported up to 12th of July, 1896; and showing also the number and tonnage of steam vessels owned in each country. (Vessels under 100 tons gross are not included in this return.)

(a) Some cases of condemnation may have been consequent upon stress of weather, &c., experienced prior to the period covered by the return. Vessels condemned after damage by fire, collision, stranding, &c., are included, according to the dates of the *casualties*, under "Burnt," "Collision," "Wrecked," &c.
 (b) Under the heading "Lost, &c." are included total losses which, for want of sufficient information, or for other reasons, cannot be otherwise classified.

(c) Under the heading "Missing" are included only vessels *posted or reported* during the year as missing.
 (d) Under the heading "Wrecked" are included vessels lost through stranding, or through striking rocks, sunken wrecks, &c.

TABLE No. 2:—Showing the number, net tonnage and nationality of SAILING VESSELS totally lost, condemned, &c., during the year 1895, as reported up to the 12th July, 1896, and showing also the number and tonnage of sailing vessels owned in each country. (Vessels under 100 tons net are not included in this return).
